PROFESSIONAL SUMMARY:

Business and Operations Leader with 12+ years' experience delivering technology led transformation, system enhancements, and process improvements. Strong expertise across full SDLC, including requirements gathering, stakeholder engagement, and Agile/Waterfall delivery. Skilled in process modelling, user journeys, and translating complex business needs into functional specifications and delivery ready reports. Experienced in supporting system transitions, UAT, and operational readiness to ensure successful adoption of new solutions. Collaborates effectively with various teams to deliver structured, outcome focused change. Proven ability to drive process optimisation, improve data visibility, and enable business continuity in fast paced environments.

CORE SKILLS:

Business Analysis & Transformation | Process Modelling (BPMN, As-Is / To-Be) & User Journeys | Requirements Elicitation & Backlog Management | Agile, Waterfall & Hybrid Delivery | Data Analysis, KPI Design & Performance Reporting | Customer Experience Optimisation | System & Process Transition Support | Continuous Improvement & Operational Excellence | Stakeholder Management, Workshop Facilitation & Executive Communication | User Acceptance Testing (UAT)

WORK EXPERIENCE:

OPERATIONS TECHNICAL LEAD, CITY & GUILDS

Feb 2024 - Present

- Lead and manage a team of Operations Technical Coordinators and Operations Administrators, assigning work, balancing priorities, and ensuring day-to-day operational delivery runs smoothly.
- Provide coaching, training, and ongoing support to team members, including the creation of development plans to build capability and confidence.
- Lead early-stage analysis across five transformation and operational improvement initiatives, shaping business problems into structured, actionable solutions prior to delivery.
- Facilitate discovery workshops to define problem statements, identify opportunities, and align stakeholders across business and technology.
- Develop end-to-end process models and user journeys, reducing process inefficiencies by around 95% across key workflows.
- Partner with senior stakeholders to define scope, priorities, and success measures, helping ensure work is focused on the right outcomes.
- Improve KPI visibility through Power BI dashboards and automated reporting solutions, supporting better monitoring and decision-making.
- Establish governance frameworks and SOPs, improving adoption of new solutions by 30% and strengthening consistency across the team.

BUSINESS ANALYST, COGNIZANT TECHNOLOGY SOLUTIONS

Feb 2022 - Sept 2023

- Converted ambiguous digital transformation objectives into structured Agile backlogs, user stories, and functional specifications for cross-functional squads reducing sprint re-work and improving velocity across multiple delivery tracks.

- Led As-Is/To-Be process analysis across 3 programme workstreams, identifying and removing bottlenecks that were blocking release cycles and misaligning delivery against strategic targets.
- Bridged product, engineering, and business stakeholders by reframing complex problems into clear, decision-ready outputs reducing escalations and enabling faster alignment on priorities and scope trade-offs.

SOFTWARE BUSINESS ANALYST, ENTERPRISE SOFTLABS PVT. LTD. Apr 2021 - Oct 2021

- Gathered, structured, and validated business and system requirements for enterprise software solutions, producing functional specifications and user stories that enabled Agile teams to deliver without ambiguity.
- Facilitated stakeholder workshops to define requirements and validate solution design, ensuring delivery outcomes were traceable to original business intent.

SENIOR BUSINESS ANALYST, BCT CONSULTING PVT. LTD. Jun 2018 - Feb 2021

- Delivered data-driven pricing and commercial analysis that contributed directly to \$24M in revenue recovery translating raw transactional datasets into executive-ready insights and concrete strategic recommendations.
- Led analysis across 3 strategic initiatives spanning digital products and operational transformation; produced feasibility assessments and business cases that shaped organisational investment decisions at board level.
- Drove 27% improvement in operational efficiency and an 18% increase in customer satisfaction by redesigning end-to-end workflows and aligning solution design with verified user and business needs.
- Scaled team analytical capability by mentoring 6 junior analysts, standardising output quality and methodology consistency across the practice.

APPLICATION DELIVERY SPECIALIST, DXC TECHNOLOGY Oct 2012 - Aug 2017

- Supported enterprise applications handling ~1000 daily transactions, ensuring high availability and performance.
- Maintained >98% SLA compliance for enterprise applications processing ~1,000 daily transactions across 3 regions achieved through proactive monitoring frameworks, structured root cause analysis, and cross-functional vendor coordination.

TECHNICAL SKILLS:

Delivery & Governance: Metrics & Risk tracking, KPI design, Agile, Waterfall & Hybrid delivery, Jira.

Data Analytics: Microsoft Fabric, Power BI, Tableau, Advanced Excel, R / R Shiny, SAP.

Process Modelling: As-Is/To-Be & BPMN modelling, User journey mapping, ARIS, Visio, Miro.

AI & Automation: MS Power Platform, Workflow automation (RPA & NLP), Neural Networks (GenAI & LLM).

CERTIFICATION:

Microsoft Fabric Analyst | Neural Networks with Deep Learning | Software AG Certified ARIS Modeler |
Celonis Certified Implementation Professional

EDUCATION:

Bachelor of Engineering – Electrical & Electronics Engineering
Velammal Institute of Technology - Class of 2012
